SUMMARY

AWS Cloud DevOps Engineer with 2.8 years of production infrastructure automation expertise. Specialized in Kubernetes orchestration, Terraform IaC, CI/CD automation, and observability. Managed 650+ applications across BFSI/public-sector with 99.95% uptime. Proven incident management and operational automation in regulated enterprise environments.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, RDS, ALB, Auto Scaling, CloudWatch, IAM, VPC), Azure VM & Networking

Container Orchestration: Kubernetes, Amazon EKS, Docker, MicroK8s, container security

Infrastructure Automation: Terraform, Ansible

CI/CD & Deployment: Jenkins, GitLab CI, SonarQube, Blue-Green deployment, Canary releases

Observability & Monitoring: Prometheus, Grafana, CloudWatch, Percona Monitoring and Management

Container Security: Trivy, Harbor, SBOM/CBOM scanning, vulnerability assessment, compliance

Linux Administration: User management, SSH hardening, firewall configuration, cron automation, service optimization

Database Administration: MySQL, Percona XtraDB Cluster, ProxySQL, Orchestrator, HAProxy, high-availability architecture

Incident Management & Troubleshooting: Root cause analysis, incident recovery, production support, cluster failover, performance tuning

Version Control: Git, GitHub, GitLab

Programming Languages: Python, Bash scripting, SQL

PROFESSIONAL EXPERIENCE

Cloud DevOps Engineer

Jan 2024 – Present

Apmosys Technologies Pvt Ltd.

Navi Mumbai

- Primary DevOps owner: 650+ applications across BFSI/public-sector; maintained 99.95% uptime SLA with zero-downtime deployments.
- Resolved critical OOM failure via JVM tuning (`-Xms256m -Xmx1536m -XX:+UseG1GC`) and Kubernetes resource limits; eliminated recurrence.
- Designed multi-environment CI/CD pipelines (Jenkins, GitLab CI) with Blue-Green/Canary strategies; reduced deployment failures 95%.
- Provisioned AWS infrastructure via Terraform: VPCs, EC2 Auto Scaling, ALB, IAM, EKS clusters with Helm and HPA policies.
- Implemented Prometheus/Grafana observability stack with OOM/crash-loop alerting; reduced MTTD by 60%.
- Led production incident recovery: node draining, workload restoration, failover coordination, rollback execution.

IT Infrastructure Intern

Jul 2023 – Dec 2023

Akhrabhi Softlabs

- Linux server administration: user provisioning, cron automation, SSH hardening, firewall configuration, service minimization.
- Automated OS deployment via Ansible; reduced manual provisioning effort 70%, improved operational efficiency.

KEY PROJECTS

Enterprise Kubernetes Platform & Container Security | *Kubernetes, EKS, Harbor, Trivy, Prometheus, ArgoCD*

- Deployed HA Kubernetes workloads for IDBI Bank, RBL Bank, CRIS, NSDL in regulated BFSI environments; 99.95% SLA compliance.
- Integrated Harbor, Trivy, SBOM/CBOM validation into container pipelines; reduced security incidents 80%, enabled compliance audits.
- Orchestrated incident recovery: node draining, pod migration, failover coordination; RTO under 5 minutes, RPO near-zero.

MySQL High-Availability DC/DR Migration | *Percona XtraDB Cluster, ProxySQL, HAProxy, Orchestrator, Terraform*

- Migrated MySQL to 3-node Percona XtraDB Cluster with GTID replication, semi-sync replication across DC/DR; 99.95% uptime.
- Configured ProxySQL read/write routing with HAProxy load balancing; reduced query latency 25%, transparent failover.
- Implemented automated backup validation, DR drills, failover testing via Orchestrator; ensured data consistency and RTO compliance.

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Trident Academy of Creative Technology

CGPA: 9.0

Bachelor of Computer Applications (BCA)

2019 – 2022

Swami Vivekanand Memorial College

CGPA: 9.1
